VirTra SIMULATION | COMPETITOR EMULATION

Know *the Difference.*
See *the Difference.*

VirTra SIMULATION	✔		Competitor EMULATION
Multiple Incidents Interacting on Multiple Screens at the same time	✔		Only SINGLE screen incidents stretched over multiple screens
Dialogue-based scenarios for de-escalation training	✔		'Comply or Die' basic scenarios
Keyword Search for Scenarios & Automatic Software Updates	✔		Folder Filing without Keyword or Category Search Tool
Brand Specific Ballistic Coefficients Calculator	✔		Inaccuracy without verified calculator software
HUNDREDS of outcomes per multi-incident scenario	✔		A few possible outcomes per scenario
Training Reaction Timing Capture Software	✔		Basic Shot Overlay Debrief
Threat-Fire wireless feedback device for realism	✔		Wearing face protection with foam ball cannon
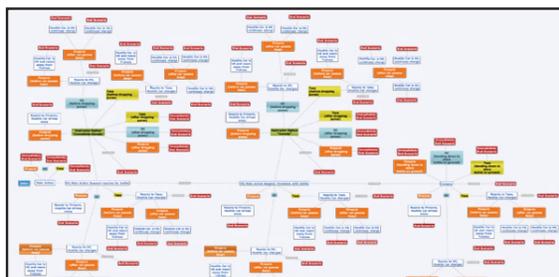

VirTra Multi-Incident Scenario Branching
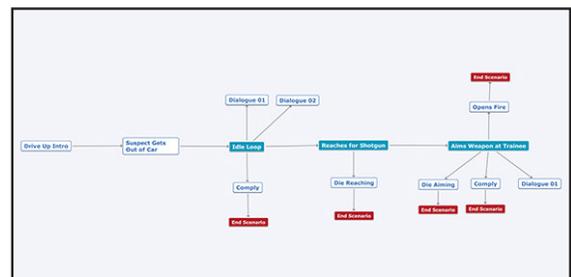

Competitor's Scenario Branching

VirTra

The Value of VirTra

To You: Benefits & Best Practices

Patented Threat Fire™ Device simulates return fire ▶ State-of-the-art electric impulses power the feedback device and enhance training focus. No safety equipment needed, no firing of live projectiles. Minimizes injury risk and training failure.

Superior TASER training abilities ▶ Cross-connect ability registers both top and bottom probe hits with ARCing features to engage or re-engage multiple targets. Unique laser ID scores each deployment and smart-motion sensor maintains battery life. Accurate degree spread provides true-to-life training.

Superior low-light capabilities ▶ Ambient bounce lighting creates smooth transition and superior software allows for different beam diameters with localized ground lighting.

Multiple Threats on Multiple Screens in Multiple Scenarios ▶ Increase situational awareness in real-world scenarios, also fully engages trainees' peripheral vision with separate threats on separate screens. NOT a single incident filmed then threat stretched over multiple screens.

HUNDREDS of de-escalation-based training scenarios ▶ Nearly endless branching possibilities proved the foundation for teaching and training with diverse, challenging & realistic scenarios, that use real actors, better reflecting what is actually experienced in real life encounters.

Higher training value & transferability of skills ▶ Time spent training with a VirTra simulator improves performance in the field, which saves civilian & professional lives.

Multiple-screen & multiple-threat scenarios ▶ Fully immersive and intense when reflecting real-world incidents.

Fully integrated real & interactive video based training ▶ Professional actors in a high-resolution video scripted by subject matter experts. In-depth details including: eye movement; muscle reaction and body language for a more efficient training experience. Highly-detailed dialogue options are combined with equally detailed non-verbal communications in real environments.

V-Author™ custom content creation ▶ The ability to create your own customized content based on your own location and needs—weather, urban/rural landscape, geographic topography, anticipated crowds and demonstrators. Pre-loaded assets to enhance training efficiency.

Superior Event Sequencing – Branching Scenarios ▶ Sequence and Branching options directly tied to trainee actions in the moment with numerous possibilities that unfold depending on trainee's actions.

Ongoing Research & Development ▶ Client requests are not only met, but often exceeded by VirTra's ongoing research & development practices led by experienced employees with 200+ years experience.
